

A RESOLUTION OF THE PARISH OF EAST FELICIANA, STATE OF LOUISIANA, OPPOSING THE USE OF CARBON CAPTURE AND SEQUESTRATION (CCS) PROJECTS WITHIN THE PARISH BOUNDARIES AND REQUESTING A MORATORIUM FROM THE LOUISIANA LEGISLATURE ON ISSUING PERMITS FOR INJECTION WELLS

WHEREAS, Carbon Capture and Sequestration (CCS) is a technology involving the capture of carbon dioxide emissions from industrial sources and the subsequent transport and injection of the deep underground for storage; and

WHEREAS, a growing number of companies have proposed such projects throughout Louisiana, including within the boundaries of East Feliciana; and

WHEREAS, the health, safety, and welfare of the citizens of East Feliciana Parish are the highest priority of the governing body of East Feliciana Parish; and

WHEREAS, the potential risks associated with CCS and pipeline infrastructure raise significant concerns, including but not limited to:

- The potential for ruptured pipelines and subsequent toxic releases, which can cause asphyxiation in surrounding communities.
- The risk of groundwater and drinking water contamination from leaking injection wells.
- The possibility of increased seismic activity, which can be triggered by injecting high-pressure fluids underground.

WHEREAS, the use of eminent domain for private gain is an ongoing concern in Louisiana. The potential use of eminent domain to seize private property for CCS pipelines and storage sites is opposed by many landowners; and

WHEREAS, communities across Louisiana, particularly those with a history of environmental justice struggles, have pushed back against being subjected to new forms of pollution and industrial risk; and

WHEREAS, the regulatory oversight of CCS projects at both the state and federal levels is viewed by many as inadequate and not sufficiently protective of local interests and community rights; and

WHEREAS, this Governing Body believes the risks associated with CCS and its related infrastructure, including pipelines and injection wells, outweigh the purported benefits for the citizens of East Feliciana Parish; and

WHEREAS, there is a need for further independent study and public discourse to better understand the long-term impacts of carbon sequestration before projects are permitted;

THEREFORE BE IT RESOLVED, that the Governing Body of the Parish of East Feliciana does hereby express its formal and unequivocal opposition to the development and deployment of carbon capture and sequestration (CCS) projects within its boundaries.

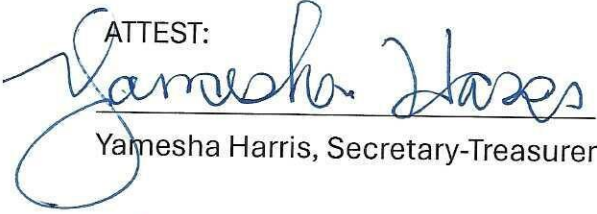

BE IT FURTHER RESOLVED, that the East Feliciana Parish Police Jury calls upon the Louisiana State Legislature and relevant state agencies to impose an immediate moratorium on issuing permits for Class VI injection wells and other CCS-related infrastructure within the parish, pending further independent scientific review and robust public engagement.

BE IT FURTHER RESOLVED, that this resolution asserts the right of local control and self-determination regarding industrial development that poses a threat to the health, safety, and property rights of the parish's residents.

BE IT FINALLY RESOLVED, that a copy of this resolution be sent to the Louisiana Governor, the Louisiana Department of Natural Resources, the parish's legislative delegation, and the U.S. Environmental Protection Agency.

ADOPTED this 6th day of April 2026, by the Governing Body of the Parish of East Feliciana

ATTEST:

Yamesha Harris, Secretary-Treasurer

Louis Kent, Police Jury President
