Motion by Roland Hollins, seconded by Joe Perkins.

Resolution #6674 of the Allen Parish Police Jury
Subject: Opposition to Class VI Injection Wells

WHEREAS, the Allen Parish Police Jury (APPJ) recognizes its fundamental duty to protect our local environment, land, and water resources for the health, safety, and welfare of our community;

WHEREAS, it is the understanding of the APPJ that while state law directs the Louisiana Department of Energy and Natural Resources (LDENR) to give substantial consideration to local government input, it appears to the APPJ that local concerns are often not adequately acknowledged in the state's permitting process;

WHEREAS, the APPJ has expressed its commitment to prioritizing the well-being of our residents through the enactment of local ordinances aimed at regulating injection wells to ensure community safety;

WHEREAS, it is the belief of the APPJ there appears to be a disregard for community concerns by certain corporations, highlighting what the APPJ believes to be a prioritization of profits over public health and safety;

WHEREAS, it has become evident to the APPJ that the LDENR appears to have no intent to provide necessary clarity regarding the long-term safety of injection wells nor provide adequate assurances to local governments regarding liability coverage should an accident occur;

WHEREAS, it is the understanding of the APPJ that industry has failed to adequately address local emergency concerns, as the **APPJ has yet to see a comprehensive local Hazard Mitigation Plan** submitted for review, nor has the APPJ been made aware of any formal contact with the local Homeland Security and Emergency Preparedness Director to coordinate a local emergency response plan;

WHEREAS, it is the belief of the APPJ, that **Class VI Carbon Capture and Storage (CCS)** technologies and associated infrastructure present risks, including CO_2 pipeline safety risks, groundwater contamination, induced seismicity and geological instability and long-term storage uncertainty and financial and liability risks.

WHEREAS, it is the belief of the APPJ that siting industrial injection wells and pipeline infrastructure may have a negative impact on local property values and hinder future economic development opportunities;

WHEREAS, in spite of the risks and concerns referenced above, the industry has not adequately quantified or demonstrated to local residents nor local governments, public benefit resulting from these projects, and further, recent rule changes unjustifiably and substantially reduce the local taxable value of CO_2 injection infrastructure.

NOW, THEREFORE, BE IT RESOLVED, that the Allen Parish Police Jury hereby reaffirms and expands its firm opposition to the permitting and establishment of any **Class VI injection wells** within the jurisdiction of Allen Parish, emphasizing our commitment to protecting the rights and interests of our community and the environment.

BE IT FURTHER RESOLVED, that the Allen Parish Police Jury calls upon the Louisiana Legislature and the United States Congress to enact legislation that provides local communities with meaningful authority over injection well projects and establishes stricter federal safety and financial liability standards.

BE IT FINALLY RESOLVED, that this resolution shall be communicated to the Governor of Louisiana, the Secretary of the LDENR, the Administrator of the EPA, and all relevant state and federal legislators representing Allen Parish.

This resolution having been submitted to a vote, the vote thereon was as follows:

YEAS: 8

NAYS: 0

ABSENT: 0

And the resolution was declared adopted on this, the 6th day of October, 2025.
