The following resolution was offered by Luke Dickerson and seconded by Beth Montgomery:

RESOLUTION NO 42-2025

Resolution in Opposition to Class VI Injection Wells

WHEREAS, the Beauregard Parish Police Jury (BPPJ) recognizes its fundamental duty to protect our local environment, land and water resources for the health, safety, and welfare of our community;

WHEREAS, it is the understanding of the BPPJ that the laws and regulations of the State of Louisiana (State) direct the Louisiana Department of Energy and Natural Resources (LDENR) to give substantial consideration to local government input; however, it appears to the BPPJ that local concerns are often not adequately acknowledged in the State's permitting process;

WHEREAS, it is the belief of the BPPJ that there appears to be a disregard for community concerns by certain corporations, highlighting what the BPPJ believes to be a prioritization of profits over public health and safety;

WHEREAS, it has become evident to the BPPJ that the LDENR appears to have no intent to provide necessary clarity regarding the long-term safety of injection wells nor provide adequate assurances to local governments regarding liability coverage should an accident occur;

WHEREAS, it is the understanding of the BPPJ that industry has failed to adequately address local emergency concerns, as the BPPJ has yet to see a comprehensive local hazard mitigation plan submitted for review, nor has the BPPJ been made aware of any formal contact with the local Homeland Security and Emergency Preparedness Director to coordinate a local emergency response plan;

WHEREAS, it is further the belief of the BPPJ, that Class VI Carbon Capture and Storage (CCS) technologies and associated infrastructure present risks, including carbon dioxide (CO_2) pipeline safety risks, groundwater contamination, induced seismicity and geological instability, long-term storage uncertainty and financial and liability risks.

WHEREAS, it is the belief of the BPPJ that siting industrial injection wells and pipeline infrastructure may have a negative impact on local property values and hinder future economic development opportunities;

WHEREAS, in spite of the risks and concerns referenced above, LDENR and industry has not adequately quantified or demonstrated to local residents nor local governments the public benefit resulting from these projects, and further, recent rule changes unjustifiably and substantially reduce the local taxable value of CO_2 injection infrastructure.

NOW THEREFORE, BE IT RESOLVED, that the Beauregard Parish Police Jury hereby reaffirms and expands its firm opposition to the permitting and establishment of any Class VI injection wells within the jurisdiction of Beauregard Parish, emphasizing our commitment to protecting the rights and interests of our community and the environment.

BE IT FURTHER RESOLVED, that the Beauregard Parish Police Jury calls upon the Louisiana Legislature and the United States Congress to enact legislation that provides local communities with meaningful authority over injection well projects and establishes stricter State and Federal safety and financial liability standards.

BE IT FINALLY RESOLVED, that this resolution shall be communicated to the Governor of Louisiana, the Secretary of the LDENR, the Administrator of the EPA, and all State and Federal legislators representing Beauregard Parish.

This resolution having been submitted to a vote; the vote was recorded as follows:

YEAS: Michael E. Harper, Eddie Ware, Ernest Dickerson, Jr., Jeffery Meadows, Shanel Handy, Elizabeth Montgomery, Jerry Shirley, Nelson Morgan, James Hillebrandt, Kelly Bailey

NAYS: None

ABSENT: None

And the resolution was adopted by the majority present on this 7th day of October 2025.
